

1. Links to C# interview

As back-end .net developer, it's very important to understand what kind of position we fit in.

Do we have enough information regarding the company, the team, the job and have a chance to meet long term expectations ?

Eventually How does candidate measure success by a set of parameters:

- How far has the candidate have reached?
- How big is the part of the path that was done using compass assistance?
- How did he/she handle the challenges?
- How did he/she react to criticism of their solution?

in particular understanding a candidate's depth of knowledge in C# programming language versus company's expectations.

- communication skills
- unknowns handling skills
- and ability to craft a solution to a problem.

4. Conclusion

To become back-end .Net developer is not a easy thing and choice ! however, my mindset is positive and I love take risks and get out of my confort zone. To do that a lot skills are required to inspire to be a developer. Here a list of requirements:

- Basic in C# programming and .Net/.Net core Framework
- Algorithms (sort,array, tree and graph)
- Best practices of development
- Design patterns (MVC, MVVM, Repository..)
- Read books (C#, Design pattern, Gang of four)
